MALÅ Easy Locator Pro WideRange HDR
GROUND PENETRATING RADAR

The professional’s choice for utility mapping

Now introducing a unique addition to the EL product family – MALÅ EL Pro WideRange HDR, with the widest GPR antenna bandwidth available for utility detection, on the market. Ultra-fast simultaneous high-resolution data acquisition for both shallow and deep targets – all in one solution.

The new cart has improved stability and folding mechanics. In conjunction with alternative wheel options, new controller tray, battery compartment with more battery space and a better lock, the utility locating becomes more efficient. In conjunction with the EL Pro WideRange HDR, Object Mapper 2.0, is released with improved user interface and online map support.

MALÅ Easy Locators are robust, foldable GPR-systems with exceptional data collection capabilities for utility detection and subsurface anomaly locating. The MALÅ HDR real-time sampling technology means higher data resolution and significantly better depth of penetration compared to traditional GPR technology.
